TITLE : DISPLAY UNIT ATTACHING DEVICE

ABSTRACT : PURPOSE: To facilitate attaching/detaching a display unit and rotation operation, by providing a cylindrical body movably in the shaft direction onto a lock plate fixed to a display unit attaching stand, and also providing a lever rotatably in the peripheral direction onto the cylindrical body.

CONSTITUTION: A liquid crystal monitor attaching mechanism 20 is composed of an attaching hook plate 11, an attaching mechanism casing (cylindrical body) 21, a lever 22, a pushing plate 23 having structure integral with the plate 11, a lock plate 24, a compressing spring 25, and a bolt 26, etc. The mechanism 20 is integrally attached to an attaching stand 10 by a lock plate 24. Moreover, the lever 22 is made rotatable around a shaft part 23a between the plate 11 and the pushing plate 23, and the shaft part 23a is made movable in the shaft direction of the bolt 26.
